## Today, Tomorrow, Together

Showbest Fixture Corp is a manufacturer of superior interior fixtures committed to quality store fixture production and installation. Our high level of customer service has always been our strength and as such we are pleased to be able to bring you this booklet highlighting just some of the areas in which Showbest Fixture Corp. can assist you in your green and environmentally friendly commercial interior needs. Whether your new design calls for greener products or you are managing a LEED® project - together we can make it happen.

## Sustainability

What makes a product contribute to a sustainable environment? How is the level of sustainability measured? The attributes that make up a product's level of sustainability include materials with recycled and recyclable content, responsible grown/harvested origin, rapidly renewable properties, biodegradability, low or no VOCs, no added urea formaldehyde and environmentally sensitive, energy efficient manufacturing processes. In evaluating sustainability a wide range of recognized designations and certifications provide measurable and verifiable information from third-party certifiers.

## Green Project Materials and Resources

As a leading fixture manufacturer, Showbest Fixture Corp. understands the importance of providing sustainable solutions for our customers. After nearly 40 years in business we have engineering and supply sources to create fixtures suitable for your sustainable environment or green project. We are proud to have a diverse number of suppliers who can provide us with eco-friendly products and staff within our company who are knowledgeable in both sustainable engineering and current regulations. At Showbest Fixture Corp. we deliver not only compliant fixtures, but a way to do business that supports our values of working with pride and integrity and being good stewards of our company's and communities' resources.

### CARB: California's Formaldehyde Air Toxic Control Measure

Effective January 1, 2009 The California Air Resources Board (CARB) will regulate the formaldehyde emissions from composite wood products (particleboard, MDF, and hardwood plywood) sold in the state or used to make finished goods offered for sale in the state. All materials containing composite wood products must comply with the new regulation.

## LEED® Projects

The U.S. Green Building Council maintains a check rate listing and building certifying system called Leadership in Energy and Environmental Design (also known as LEED). Showbest Fixture Corp. is able to provide your LEED® project with finished products that comply with the certifying system. See below some of the certifying areas our fixtures may assist you in reaching the LEED certification.

### Materials and Resources (MR)

<b>MR 4.1 Recycled Content</b> 1 point	Uses materials with recycled content such that the sum of post-consumer recycled content plus one half of the pre-consumer content constitutes at least 10% (based on cost) of the total value of the materials on the project.
<b>MR 4.2 Recycled Content</b> 1 point	Uses materials with recycled content such that the sum of post-consumer recycled content plus one half of the pre-consumer content constitutes an additional 10% (total 20% based on cost) of the total value of the materials on the project.
<b>MR 5.1 Regional Materials</b> 1 point	Uses a minimum of 20% of the combined value of construction and Division 12 (Furniture) materials and products that are manufactured within a 500 mile radius of the building project..
<b>MR 5.2 Regional Materials</b> 1 point	Uses a minimum of 10% of the combined value of construction and Division 12 (Furniture) materials and products that are extracted, harvested or recovered as well as manufactured within a 500 mile radius of the building project. One additional point available for 20%.
<b>MR 6 Rapidly Renewable Materials</b> 1 point	Uses rapidly renewable construction and Division 12 (Furniture) materials and products, made from plants that are typically harvested within a 10-year or shorter cycle, for 5% of the total value (\$) of all materials and products used in the project

### Indoor Environmental Quality (EQ)

<b>EQ 4.1 Low Emitting Materials (Adhesives &amp; Sealants)</b>	1 point
All adhesives and sealants used on the interiors of the building shall comply with the South Coast Air Quality Management Division (SCAQMD) Rule #1168 VOC content limits	
<b>EQ 4.2 Low Emitting Materials (Paints &amp; Coatings)</b>	1 point
All paints and coatings used on the interiors of the building shall comply with VOC content limits	
<b>EQ 4.4 Low Emitting Materials (Composite Wood &amp; Agrifiber Products, Laminating Adhesives)</b>	1 point
Composite wood and agrifiber products used on the interior of the building shall contain no added urea-formaldehyde resins. Laminating adhesives used to fabricate on-site and shop-applied composite wood and agrifiber assemblies shall contain no added urea-formaldehyde resins.	
<b>EQ 4.5 Low Emitting Materials (Furniture)</b>	1 point
Components of furniture and their assembly must meet the requirements of EQ4.1 Adhesives & Sealants, EQ4.2 Paints and Coatings, EQ4.4 Composite Wood and Agrifiber products, laminating Adhesives.	

**At Showbest we believe in partnering on your project. Talk with our LEED® Accredited Professionals for the credits our fixtures can help your next project achieve.**
